

Diversity Jeopardy

Chico Ramirez and Steve Herro have been using a form of “Diversity Jeopardy” in our Diversity Circle. We decided to implement this light form of education for a couple of reasons:

1. It is a creative way to make educational points related to the economics, history, sociology, philosophy, business, etc. aspects of immigration;
2. It is interactive;
3. It helps loosen people up.

There were a number of sources that we used for our questions, including local *Green Bay Press-Gazette* reports on diversity and immigration in Brown County, research done by the Diversity Circle group from the “Do You Know Your Neighbors?” project, U.S. Census figures, articles from national newspapers on immigration, and myths from the Justice for Immigrants (<http://justiceforimmigrants.org/myths.html>) and PBS New Americans (<http://www.pbs.org/independentlens/newamericans/quiz.html>).

In addition to Diversity Jeopardy, we also used one other interactive activity during week three. In order to help circle members connect one’s perspectives on diversity and immigration more closely with one’s personal background, we asked each person to write one factoid about one’s life that has affected his or her perspective on diversity on a card. The cards were thrown into a hat, and one card was chosen at random by another member. The card drawer was expected to answer which member was connected to that drawn factoid.

Diversity Jeopardy: Week 1

1. The first significant wave of Dutch immigration to Brown County occurred in what decade?
 - a. 1810s
 - b. 1820s
